ABSTRACT

Statistics systematized from the 1967 Survey of Economic Opportunity for a study of the poverty dimensions of rural-to-urban migration are presented in this report. The data presented in the tables were collected by the Bureau of the Census for the Office of Economic Opportunity. Information is included on the total and poor households, families and populations, and on the migration status and residence history of persons 14 years old and over. Family size and composition and income of families and unrelated individuals are shown. Data are also provided on regional and environmental residence of origin and on the extent to which rural-urban migrants are located in regions and metropolitan areas of various sizes. The exchange of persons between the South and the rest of the country is given particular attention. Rural-urban migrants are compared with their urban host population and with the population remaining in rural areas. Characteristics relevant to economic well-being are considered, such as education, marital status, fertility, working-limiting health conditions, employment, receipt of public assistance income, assets, liabilities, and net worth. All numbers in the tables represent 1967 sample data expanded to universe totals and rounded to thousands. (Author/HBC)

PREFACE

This research is the product of the cooperative efforts of many people in several Federal and private research agencies and the University of Georgia. Data are based on the 1967 Survey of Economic Opportunity, the latest such survey; and this bulletin represents the first comprehensive statistics on cumulative rural-urban migration and its poverty dimensions.

The Office of Economic Opportunity (OEO) planned and funded the survey on which the study was based. The Bureau of the Census collected the data and prepared the first magnetic data tapes. OEO in conjunction with the Brookings Institution and the ASSIST Corporation edited and imputed data, organized data tapes to facilitate processing, and developed accompanying software packages.

The U.S. Department of Agriculture (USDA) and the University of Georgia (UGA) jointly planned the study and conducted data processing and analytical work. OEO provided financial assistance and statistical support. This publication, and others in the series, represent the work of a number of staff members within these agencies. The series results from a USDA contract with OEO to make this type of information available.

Gladys K. Bowles (USDA) served as project director. A. Lloyd Bacon (UGA) was co-director and had primary responsibility for the adequacy and accuracy of the statistical materials; he was assisted by P. Neal Ritchey (UGA). Hueoung Lock Oh (OEO) served as a statistical consultant on sampling and wrote chapter 20. Vera J. Banks (USDA) and Anne S. Lee (UGA) consulted on format and content of the publication. R. Douglas McLeod (UGA) supervised the data processing operations, assisted by Paul W. Bandow, Mattice T. Brashear, Glenda K. Gower, Mae R. Kovacich, Patricia M. Strong, Delores H. Thibodeau, and Billy H. Thompson. Brashear and Gower served as mathematical and statistical consultants on the project. Gower calculated specific measures of significance for ratios and medians. Joneita D. Bacon (UGA) supervised clerical work and acted as study secretary. Her assistants were Barbara A. Bishop, Lorine C. Jones, Bruce L. Little, and Tina D. Little.

Calvin L. Beale initiated the project, consulted on various aspects of the work, and was administrative supervisor for USDA. Homer C. Cooper and William A. Owens (UGA) were administrative supervisors. Patricia Koshel (OEO) was project monitor.

The Office of General Research (UGA) underwrote most of the computer costs, and staff members of the University Computer Center were consulted on many aspects of processing the data tabulations.

PART I. INTRODUCTION

Chapter 1.--Introduction

Recent years have witnessed great public interest in the nature and consequences of migration of rural people to the cities. Particularly evident has been concern over the extent to which rural-urban migrants may have failed to attain adequate employment and income and as a result have joined the ranks of the urban poor or persons dependent on welfare. But actual data on rural-urban migration and its poverty dimensions have been lacking.

This report presents statistics systematized from the 1967 Survey of Economic Opportunity (SEO) for a study of the poverty dimensions of rural-to-urban migration (cited henceforth as the USDA-UGA study). The data are summarized and analyzed in two forthcoming publications in this series of Population-Migration Reports on Rural-Urban Migrants:

1. Bowles, Gladys K., Bacon, A. Lloyd, Ritchey, P. Neal, and Gower, Glenda K.

Poverty Dimensions of Rural-to-Urban Migration: A Chartbook. Volume I, Part 2. U.S. Department of Agriculture, University of Georgia, and Office of Economic Opportunity, cooperating.

2. Lee, Anne S., and Bowles, Gladys K.

Migration and Poverty in the United States in 1967. U.S. Department of Agriculture, University of Georgia, and Office of Economic Opportunity, cooperating.

Parts II through VIII of this report include statistical tables with detail for migrants and nonmigrants and residence history categories, by major demographic, social, and economic characteristics.

Part II provides information on the total and poor households, families, and populations, and on the migration status and residence history of heads and of unrelated individuals, ^{1/} and of persons 14 years old and over. Family size and composition, and income of families and unrelated individuals are stressed. Part III shows migration status and regional and environmental residence history of the urban and rural populations, and the extent to which rural-urban migrants are located in regions and nonmetropolitan areas and metropolitan areas of various sizes. Exchanges of persons between the South and the rest of the country are featured. In parts IV-VIII, rural-urban migrants are compared with their urban host population and with persons remaining in rural areas. Attention is

^{1/} Persons who live alone or with others to whom they are not related.

given to education, marital status, fertility, work-limiting health conditions, employment, receipt of public assistance income, assets, liabilities, and net worth.

This series of reports tells much about the pervasiveness and concentrations of poverty in the United States. A comprehensive picture of the economic well-being of the Nation's population is presented, along with comparison of the situation of rural-urban migrants and other migrant and nonmigrant populations.

Except for "migration status and residence history" categories and "poverty" status, key terms from the USDA-UGA study are not defined in this chapter. Definitions and explanations of other terms and fuller descriptions of migration status and residence history categories, and of poverty status appear in chapter 21, "Definitions and Explanations".

Migration Status and Residence History Definitions

Questions in the SEO were designed to classify as migrants persons who had ever lived more than 50 miles away from their 1967 addresses. Migrants were asked about the residential type and location of their "last such place" of residence and their residence at age 16 (fig. 1). Previous residences reported as being in the suburbs or in cities of large, medium, or small size were classified as urban. Previous residences in a town or village of under 2,500 population or in the open country (farm or nonfarm) were defined as rural.

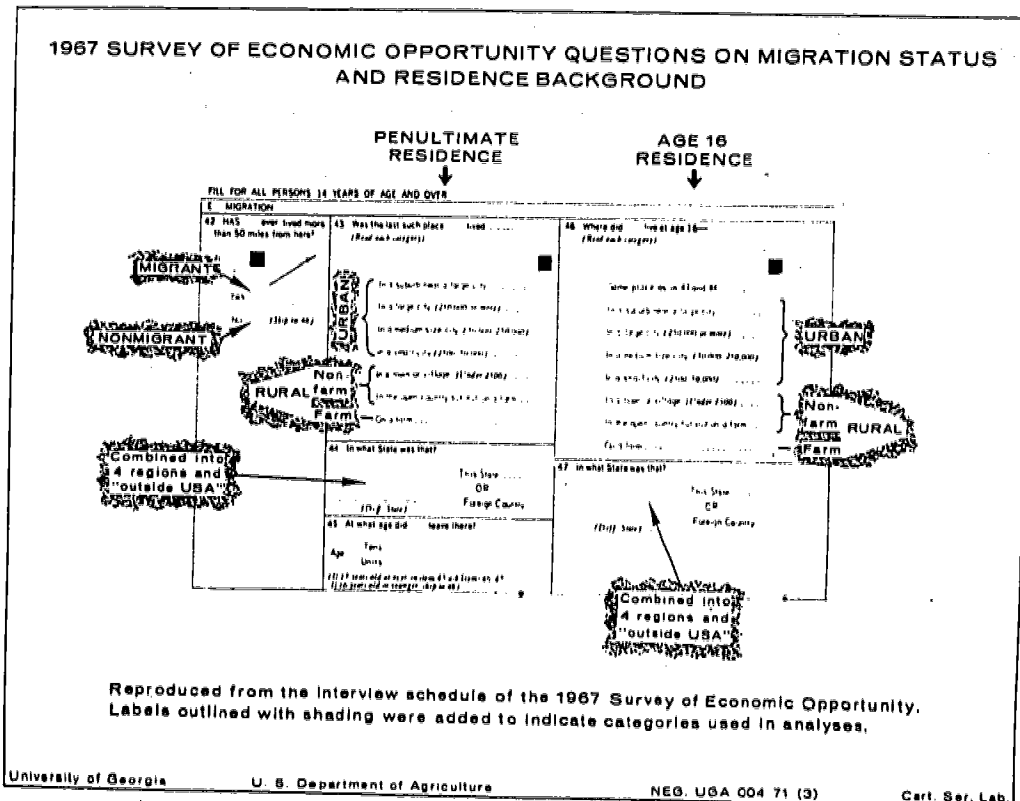

Figure 1

Region of origin and 1967 region (Northeast, North Central, South, and West) were cross-related to provide categories of inter- and intra-regional migrants. (In chapter 8, exchanges of people between two regions of the

Figure 2

country--South and non-South--are considered.) Persons whose initial residences were outside the United States were separately identified. Nonmigrants were designated by their region and rural or urban residence in 1967.

The migration data in the 1967 SEO are cumulative in effect, rather than specific to a certain time period, as in decennial censuses and the CPS. The most nearly comparable data are those published by the Bureau of the Census on lifetime and 1955-60 migration from the 1960 Census of Population and those by Karl E. Taeuber and associates, and Calvin L. Beale and associates based on 1958 residence history materials obtained in conjunction with a study sponsored by the Public Health Service (1, 2, and 3). 2/

Systematic comparisons of SEO migration data with those from other sources are difficult because of the 50-mile criterion of migration. SEO estimates are undoubtedly conservative, since persons who had moved less than 50 miles were treated as nonmigrants even if they had crossed a county or State line. For this reason, the rural and urban nonmigrant populations are not entirely of those residence origins. A rural person who migrated to a city less than 50 miles away from his age 16 residence is not classed as a migrant and therefore is included in the urban nonmigrant population. Similarly, an urban person moving to a rural area less than 50 miles away from his home city is included in the rural nonmigrant population. The numbers of such persons not included in the migrant population may be substantial in some instances. Farm to nonfarm migrants appear to be underestimated in SEO data when compared with estimates from other sources, in part because of the 50-mile criterion, and also the subjective nature of the migration questions. Other very rough comparisons that can be made with data from other sources indicate that the SEO migration estimates, by important characteristics, are reasonable.

1967 SEO Poverty Definition

In the 1967 SEO, poverty status was determined for each family (or unrelated individual) by relating 1966 income of its members to a standard set of poverty-level income thresholds used in Federal Government statistical reports to identify the poor. These thresholds were developed by the Social Security Administration (SSA) in 1964, and revised by a Federal Interagency Committee in 1969. They provide a range of income cutoffs adjusted by such factors as family size, sex of the family head, number of children under 18 years old, and farm-nonfarm residence. At the core of this definition of poverty is a nutritionally adequate food plan ("economy" plan) designed by USDA for "emergency or temporary use when funds are low". The SSA poverty thresholds also take into account differences in the cost of living between farm and nonfarm families. Annual revisions in these thresholds are based on changes in the consumer price index.

In 1966, the poverty thresholds ranged from \$1,319 for a female unrelated individual 65 years old and over living on a farm, to \$5,903 for a nonfarm

2/ Underscored numbers in parentheses refer to items in References Cited at the end of the report.

family with a male head and seven or more persons. The poverty threshold for a nonfarm husband-wife couple with two minor children was \$3,289 (see chapter 21).

The percentage of families or persons within a given category who had poverty-level incomes is referred to in this series of reports as the "incidence of poverty". Poverty status and other socioeconomic indicators for rural-urban migrants and comparative populations refer to conditions in 1967, not those prevailing when migrants left or joined other populations. The 1967 SEO did not provide information on socioeconomic conditions of people prior to their moves. Differences in incidence of poverty of the magnitudes that will be seen in the tables to follow indicate that, on the whole, rural-urban migrants have bettered their position markedly compared with people remaining in rural areas. Without doubt, however, some of these migrants had above average status at the time they moved or characteristics or attributes conducive to achievement whether they had moved or remained at home.

Detail of Data Published

A primary objective of the USDA-UGA study was the ordering and publishing of data from the 1967 SEO relevant to rural-to-urban migration and its poverty dimensions. Therefore, most tables in this volume include cross-tabulations for the total and poverty populations by major demographic factors known to be closely associated with poverty: (1) color or race, (2) sex, (3) age, usually in three or four broad categories, and (4) migration status and residence history. Generally, numbers, percentage distributions, and percentages of incidence are included in the tables regardless of the size of the population base so that users wishing to make higher levels of aggregation may do so easily. Medians in the tables on education, income, assets, liabilities, and net worth, are not shown where based on less than 100,000 total or white populations or less than 50,000 Negro population. Medians are also not shown where the error due to sampling variation was larger than the median itself. In tables 48 and 49, fertility ratios are included for all categories, regardless of the size of base, but standard errors for each ratio are shown.

Measures of Statistical Significance

Chapter 20, "Source and Reliability of the Data", presents standard errors of numbers and percentages with varying sizes of base. Standard errors for medians of education, income, assets, liabilities, and net worth and for fertility ratios, appear on or immediately following the tables to which they relate. Use of these measures will help prevent misinterpretation of the detailed tabular data.

Availability on Magnetic Tape of 1967 SEO Data from USDA-UGA Study

Data presented in tables 1-90 of this volume are available in two magnetic tape versions at moderate cost, from the Institute for Behavioral Research, University of Georgia (4 and 5). A print format tape has table titles, column headings, and stub identifications--as printed in the tables of this volume--along with comma-edited numerical data. When accessed, an entire table is printed out. A data format tape has only numerical data. This tape can be used to obtain higher levels of aggregation or to derive measures of relationships.

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

** EXCLUDES PERSONS FOR WHOM RESIDENCE HISTORY WAS INCOMPLETE.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 2.--UNITED STATES--PERSONS OF ALL AGES: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 4.--UNITED STATES--MIGRATION STATUS OF FAMILIES AND UNRELATED INDIVIDUALS: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

HOUSEHOLDS, FAMILIES, AND POPULATIONS

19

TABLE 7.--UNITED STATES--MIGRATION STATUS (ABBREVIATED) OF PERSONS 14 YEARS OLD AND OVER: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 7.--UNITED STATES--MIGRATION STATUS (ABBREVIATED) OF PERSONS 14 YEARS OLD AND OVER: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

| AGE, SEX, MIGRATION STATUS, AND ABBREVIATED RESIDENCE HISTORY | ALL RACES * | | | | | WHITE | | | | | NEGRO | | | | |

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

(CONTINUED)

*INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

FAMILY SIZE AND COMPOSITION

TABLE 11.--UNITED STATES--FAMILY SIZE AND COMPOSITION OF URBAN POPULATION OF URBAN ORIGIN: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY FAMILIES, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

*INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

(CONTINUED)

*INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 13.--UNITED STATES--FAMILY SIZE AND COMPOSITION OF RURAL POPULATION OF RURAL ORIGIN: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY FAMILIES, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES

** SMALL BASE.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 17.--UNITED STATES--INCOME IN 1960 OF URBAN-RURAL MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF FAMILIES AND UNRELATED INDIVIDUALS IN THE TOTAL AND POVERTY POPULATIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

METROPOLITAN - NONMETROPOLITAN RESIDENCE

TABLE 20.--UNITED STATES--NONMETROPOLITAN RESIDENCE: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

METROPOLITAN - NONMETROPOLITAN RESIDENCE

67

TABLE 20.--UNITED STATES--NONMETROPOLITAN RESIDENCE: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

| METRO RESIDENCE, AGE, SEX, MIGRA- TION STATUS, AND ABBREVIATED RESI- DENCE HISTORY | ALL RACES * | | | | | WHITE | | | | | NEGRO | | | | |

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

METROPOLITAN - NONMETROPOLITAN RESIDENCE

TABLE 21.--UNITED STATES--POOR AREAS OF CENTRAL CITIES OF SMSA'S 250,000 AND OVER: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 22.--UNITED STATES--NONPOOR AREAS OF CENTRAL CITIES OF SMSA'S 250,000 AND OVER: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

Chapter 6.--Size of Residence

TABLE 21.--UNITED STATES--SIZE OF RESIDENCE OF RURAL-URBAN MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

| MIGRANT CATEGORY, AGE, AND SIZE OF RESIDENCE | ALL RACES * | | | WHITE | | | NEGRO | | |

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

SIZE OF RESIDENCE

83

TABLE 22.--UNITED STATES--SIZE OF RESIDENCE OF RURAL NONFARM-URBAN MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

| MIGRANT CATEGORY, AGE, AND SIZE OF RESIDENCE* | ALL RACES * | | | WHITE | | | NEGRO | | |

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

SIZE OF RESIDENCE

TABLE 26.--UNITED STATES--SIZE OF RESIDENCE OF URBAN POPULATION OF URBAN ORIGIN: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

* FIGURES NOT SHOWN FOR WHITE AND NEGRO.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 29.--UNITED STATES--STAGES OF MIGRATION AND SIZE OF RESIDENCE OF RURAL-URBAN MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967 *

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

REGION OF RESIDENCE

TABLE 30.--REGIONS--NORTHEAST--MIGRATION STATUS OF PERSONS 14 YEARS OLD AND OVER: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

| AGE, SEX, MIGRATION STATUS, AND ABBREVIATED RESIDENCE HISTORY | ALL RACES * | | | | | WHITE | | | | | NEGRO | | | | |

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 31.--REGIONS--NORTH CENTRAL--MIGRATION STATUS OF PERSONS 14 YEARS OLD AND OVER: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 33.--REGIONS--EST--MIGRATION STATUS OF PERSONS 14 YEARS OLD AND OVER: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 13.--REGION--WEST--MIGRATION STATUS OF PERSONS 14 YEARS OLD AND OVER: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 36.--REGIONS--NONMIGRANTS AND MIGRANTS WITHIN THE SOUTH: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

| TYPE OF MOVEMENT, AGE, SEX, MIGRA- TION STATUS, AND ABBREVIATED RESI- DENCE HISTORY | ALL RACES * | | | WHITE | | | NEGRO | | |
|---|-----------------------|-------------------------|-----------------------|-----------------------|-------------------------|-----------------------|-----------------------|-------------------------|-----------------------|

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 37.--REGIONS--NONMIGRANTS AND MIGRANTS WITHIN THE NORTH AND WEST: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND RATIOS WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. RATIOS WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 48A. UNITED STATES--RATIOS AND STANDARD ERRORS: RATIOS AND STANDARD ERRORS OF NUMBER OF CHILDREN EVER BORN PER 1,000 WOMEN 15-49 YEARS OLD IN THE TOTAL AND POVERTY POPULATIONS, BY SELECTED CHARACTERISTICS, 1967

* INCLUDES WHITE, NEGRO AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

WORK-LIMITING HEALTH CONDITIONS

TABLE 51.--UNITED STATES--WORK-LIMITING HEALTH CONDITIONS: PERCENTAGES OF THE TOTAL AND POVERTY POPULATIONS 14-64 YEARS OLD WITH A CONDITION, AND PERCENTAGES WITH AND WITHOUT A CONDITION LIVING UNDER POVERTY, BY SELECTED CHARACTERISTICS, 1967

| AGE, SEX, MIGRATION STATUS, AND ABBREVIATED RESIDENCE HISTORY | PERCENT WITH A CONDITION | | | | | | PERCENT IN POVERTY | | | | | |
|---|--------------------------|-------------------|-----------------|-------------------|-----------------|-------------------|--------------------|-------------------|----------------|-------------------|----------------|-------------------|
| | ALL RACES * | | WHITE | | NEGRO | | ALL RACES * | | WHITE | | NEGRO | |

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

LABOR FORCE PARTICIPATION AND EMPLOYMENT

173

TABLE 53.--UNITED STATES--NOT EMPLOYED AND LOOKED FOR WORK IN 1966: PERCENTAGES OF THE TOTAL AND POVERTY POPULATIONS WHO WERE NOT EMPLOYED IN 1966 AND PERCENTAGES OF THOSE NOT EMPLOYED WHO LOOKED FOR WORK, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY

TABLE 58.--UNITED STATES--EMPLOYED 50-52 WEEKS IN 1966: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

OCCUPATION

TABLE 59.--UNITED STATES--OCCUPATION IN 1965: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967 193

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 60.--UNITED STATES--OCCUPATION IN 1966 OF RURAL-URBAN MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 60.—UNITED STATES—OCCUPATION IN 1966 OF RURAL-URBAN MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 61.--UNITED STATES--OCCUPATION IN 1966 OF URBAN POPULATION OF URBAN ORIGIN: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION". BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 62.--UNITED STATES--OCCUPATION IN 1966 OF URBAN-RURAL MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

OCCUPATION

TABLE 63.--UNITED STATES--OCCUPATION IN 1966 OF RURAL POPULATION OF RURAL ORIGIN: NUMBER AND PERCENTAGE DISTRIBUTION OF TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

Chapter 15.--Industry

TABLE 64.--UNITED STATES--INDUSTRY IN 1966: NUMBER AND PERCENTAGE DISTRIBUTION OF TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 45.--UNITED STATES--INDUSTRY IN 1966 OF RURAL-URBAN MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

| | ALL RACES * | | | | | WHITE | | | | | NEGRO | | | | |

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

L NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS.
PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

INDUSTRY

TABLE 66.--UNITED STATES--INDUSTRY IN 1966 OF URBAN POPULATION OF URBAN ORIGIN: NUMBER AND PERCENTAGE DISTRIBUTION OF TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

| MIGRANT OR RESIDENCE CATEGORY, AGE, SEX, AND INDUSTRY | TOTAL | | | POVERTY | | | TOTAL | | | POVERTY | | | TOTAL | | | POVERTY | | |

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 17.--UNITED STATES--INDUSTRY IN 1966 OF URBAN-RURAL MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 67.--UNITED STATES--INDUSTRY IN 1966 OF URBAN-RURAL MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF TOTAL AND POVERTY POPULATIONS, AND PERCENTAGE LIVING UNDER POVERTY CONDITIONS, BY SELECTED CHARACTERISTICS, 1967

| MIGRANT OR RESIDENCE CATEGORY, AGE, SEX, AND INDUSTRY | ALL RACES * | | | WHITE | | | NEGRO | | |
|---|--------------|--------------|-----------------------|--------------|--------------|-----------------------|--------------|--------------|-----------------------|

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 69.--UNITED STATES--PUBLIC ASSISTANCE: NUMBER AND PERCENTAGE OF THE TOTAL AND POVERTY FAMILIES AND UNRELATED INDIVIDUALS RECEIVING PUBLIC ASSISTANCE, BY SELECTED CHARACTERISTICS, 1967

| TYPE OF UNIT, AGE, SEX, MIGRA- TION STATUS, AND ABBREVIATED RESI- DENCE HISTORY | ALL RACES * | | | | WHITE | | | | NEGRO | | | |

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

STATE AND LOCAL PUBLIC ASSISTANCE

TABLE 70.--UNITED STATES--PUBLIC ASSISTANCE--UNITS RECEIVING AND AMOUNT RECEIVED: PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY FAMILIES AND UNRELATED INDIVIDUALS RECEIVING PUBLIC ASSISTANCE AND AMOUNT RECEIVED, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES.

FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION". BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 74.--UNITED STATES--AMOUNT OF PUBLIC ASSISTANCE OF URBAN-RURAL MIGRANTS: NUMBER AND PERCENTAGE DISTRIBUTION OF THE TOTAL AND POVERTY FAMILIES AND UNRELATED INDIVIDUALS BY AMOUNT RECEIVED, BY SELECTED CHARACTERISTICS, 1967

* INCLUDES WHITE, NEGRO, AND OTHER RACES. ** SMALL BASE OR MEDIAN IN FIRST INTERVAL. FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES. ** SMALL BASE OR MEDIAN IN FIRST INTERVAL. FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES. ** SMALL BASE OR MEDIAN IN FIRST INTERVAL. FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

TABLE 90.--UNITED STATES--ASSETS IN 1967 OF RURAL POPULATION OF RURAL ORIGIN: NUMBER AND PERCENTAGE DISTRIBUTION OF FAMILIES AND UNRELATED INDIVIDUALS IN THE TOTAL AND POVERTY POPULATIONS, BY SELECTED CHARACTERISTICS, 1967

(CONTINUED)

* INCLUDES WHITE, NEGRO, AND OTHER RACES. ** SMALL BASE OR MEDIAN IN FIRST INTERVAL. FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

* INCLUDES WHITE, NEGRO, AND OTHER RACES. ** SMALL BASE OR MEDIAN IN FIRST INTERVAL. FOOTNOTES APPEAR AT THE END OF THE TABLES.

ALL NUMBERS AND PERCENTAGES WERE INDEPENDENTLY ROUNDED; THEREFORE, PARTS DO NOT NECESSARILY SUM PRECISELY TO TOTALS. PERCENTAGES WERE COMPUTED AFTER ROUNDING.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION" BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY.

NOTES TO TABLES 1-90 3/All Tables

All numbers represent 1967 SEO sample data expanded to universe totals and rounded to thousands. A zero means the number was less than 500. Percentages and other derived measures were based on expanded data.

The poverty population includes persons in families, or unrelated individuals, whose incomes in 1966 were below the thresholds established by the Federal Government for units with given age and sex of head, number and composition of members, and farm-nonfarm place of residence.

The populations identified as "rural" and "urban" in the 1967 SEO differ somewhat from those which might have been obtained from a census taken at that time. Residential classifications of areas in the 1967 SEO were based on their designation in the 1960 Census of Population. Areas which had changed in character from rural to urban or vice versa between 1960 and 1967 were not reclassified for purposes of the SEO.

All Tables with Migrant Status and Residence History Categories

Unless otherwise specified, the population in these tables is the civilian noninstitutional population 14 years old and over for whom information on migration status and residence history was complete in the 1967 SEO. Migrants were defined as persons 14 years old and over who had ever lived more than 50 miles away from their 1967 addresses.

All Tables with Families and Unrelated Individuals

There were no family heads 14-16 years old; therefore, the "under 30 years" category is, in effect, persons 17-29 years of age. Unrelated individuals in these tables relate to persons 14 years old and over.

Tables 9-11

In the stub, the abbreviation "rel." was used for "other relative(s)".

3/ See chapter 21, "Definitions and Explanations", for more information.

Tables 14-18 and 76-90

Medians and means of income, assets, liabilities, and net worth were calculated from expanded but unrounded data. They were based on the distributions of families or unrelated individuals from whom values were included on the SEO data tapes, omitting those identified in the tables as "not reporting". Medians were not shown if the bases were small--fewer than 100,000 for all races and for whites, fewer than 50,000 for Negroes, and in cases in which a standard error was larger than its corresponding median. Nor were medians and means shown if the median fell in the interval representing zero or negative value.

Standard errors (1 sigma, or approximately 68 chances out of 100) were calculated by establishing confidence limits around the 50th percentile, translating the upper confidence limit into dollars, and subtracting the median from the dollar value of the upper confidence limit. To obtain 95 percent confidence intervals for the median, twice the standard error should be added and subtracted.

Tables 14-18

Medians were calculated from more detailed distributions of income than appear in these tables. "Negative" income refers to a loss in 1966 in net income from farm or nonfarm self-employment or from rental property.

Tables 19-22 and 23-29

In the 1967 SEO, metropolitan areas were defined as in the 1960 Census of Population, with one exception. The two New Jersey counties of Somerset and Middlesex were treated as metropolitan in the SEO, although they were not in a metropolitan area in the 1960 census. Central cities and rings of metropolitan areas also were as constituted in 1960. Size classifications in tables were based on the total 1960 population of metropolitan areas.

Tables 21-22

"Poor central city" refers to areas of central cities of metropolitan areas of 250,000 and over (in 1960) in tracts falling in the lowest quartile on an economic index. (See chapter 21, "Definitions and Explanations".)

Tables 30-33 and 49

For list of States included in each of the four regions, see chapter 21, "Definitions and Explanations".

Tables 34-37

Persons were omitted whose initial residence was a place outside the United States, such as the Trust Territories, Puerto Rico, and foreign countries.

Table 38

Medians for years of school completed were based on data rounded to thousands. Standard errors for these medians were calculated by the method explained above for other median-specific standard errors, applied to data on years of school completed.

Tables 43-47

Marital status was that current at the time of the survey in the spring of 1967.

Tables 48 and 49

Fertility ratios were based on data rounded to thousands. Standard errors for each ratio were calculated by the "replicate group" method. In this technique, numbers of women and children were tabulated for 20 subsamples of the entire SEO sample. Relative variances of fertility ratios were calculated from relationships between numbers of women and children in each group and their respective totals from the entire file. Standard errors were the square root of the product of the relative variance and the actual fertility ratio squared.

Table 52

"Unemployment (Year)" relates to persons who had no work experience during the year 1966 and had at some time looked for work. Thus, the estimates relate to the entire year 1966 rather than to a single week as is customary in the monthly CPS.

Tables 52-68

All labor force information relates to the entire year 1966 rather than to a single week, as is customary in the CPS.

Tables 69-75

Public assistance and welfare payments included money received in 1966 by any member of a family or by unrelated individuals from old-age assistance, aid to families with dependent children, or aid to the blind or totally disabled. Social security payments were not included, nor were food, clothing, or other nonmonetary receipts from relief agencies. In tables 71-75, averages were calculated from rounded data. Amounts are expressed to the nearest dollar.

PART IX. METHODOLOGY

Chapter 20.--Source and Reliability of the Data ^{4/}Source

The estimates in this report are based on the 1967 Survey of Economic Opportunity (SEO) (6). This survey was conducted in the spring of 1967 by the Bureau of the Census for the Office of Economic Opportunity to supplement information regularly collected in the CPS. The common items in the SEO and the CPS include personal characteristics (age, race, sex, family relationships, and marital status), last year's work experience, and income.

In addition, the SEO provides information on dimensions of poverty not usually obtained between decennial census years, such as data on housing, or obtained even less regularly, such as data on assets and liabilities. The questions on migration history, which represent the focus of this report, are a unique feature of the 1967 SEO.

Sample Design and Estimation

The SEO was spread over 357 primary sampling units (PSU's) comprising 701 counties and independent cities with coverage in all 50 States and the District of Columbia. The survey was designed to provide a disproportionately large sample of Negroes and other minority races. This procedure results in more reliable estimates for Negroes and other races, but in reduced reliability for whites or estimates not shown by race.

Approximately 29,000 occupied households were eligible for interview. Interviews were not obtained for about 2,500 of these units because the occupants were not found at home after repeated calls or were unavailable for some other reason. In addition to the 29,000, about 8,000 other sample addresses were visited but were found to be vacant or otherwise not to be interviewed.

^{4/} The text material in this chapter has been adapted from the Bureau of the Census, Current Population Reports Series, P-20, No. 200 and P-60, No. 65 (7 and 8). The tables were computed using a method similar to that described by Hansen, M. H., Hurwitz, W. N., and Madow, W. G. Sample Survey Methods and Theory, Volume I, 574-577 (9).

The estimation procedure used in this study involved the inflation of the sample to universe totals, using weights for persons or families available on the data tapes (10). The weights for the sample data were developed in a number of steps. First, each sample household was given a basic weight (the inverse of its probability of selection). An adjustment was made to account for noninterviews encountered during the survey, and further adjustments were made on the basis of three separate ratio estimates. The first of these ratio estimates took into account differences at the time of the last census between the distribution by race of the population estimates from the sample PSU's and the distribution of the total population in each of the four major regions of the country. In deriving these ratios, PSU's that comprised entire strata and that were automatically selected for the sample ("self-representing" PSU's) were excluded from the computations since they represented only themselves.

The second stage of the estimation procedure involved the inflation of the weighted sample results to independent estimates of the civilian noninstitutional population of the United States by age, race, and sex. These independent estimates were based on statistics from the 1960 Census of Population; statistics of births, deaths, immigration, and emigration; and statistics on the size of the Armed Forces.

Lastly, figures from the SEO were adjusted to agree with the 1967 CPS totals by race for metropolitan and nonmetropolitan areas.

The net effect of these three steps was to reduce both the sampling error and the possible bias of most SEO statistics below that which would have been obtained if all of the sample households and persons were weighted using only the inverse of their probability of selection.

Reliability of Estimates

Since the estimates in this report are based on a sample, they may differ somewhat from the figures that would have been obtained if a complete census were taken using the same schedules, instructions, and interviewers. In addition to this error (called sampling variability), the results are also subject to the errors of response, nonreporting, and processing inherent in sample surveys.

The standard error is primarily a measure of the sampling variability; that is, of the variations that occur by chance because a sample rather than the whole of the population is surveyed. Standard error estimates also partially measure the effect of response and enumeration errors but do not measure any systematic biases in the data. Chances are about 68 out of 100 that an estimate from the sample would differ from a complete census by less than the standard error. Chances are about 95 out of 100 that the difference would be less than twice the standard error and about 99 out of 100 that it would be less than 2-1/2 times the standard error.

Standard Error Tables.--Tables A through H provide approximate standard errors for estimated numbers and percentages of families and persons. The figures shown should be taken as an indication of the order of magnitude of the stand-

ard errors rather than the precise standard error for any specific item. For statistics by age and residence, these tables should be used with special caution. Because of the nature of the SEO sample and the way in which the sample weights were assigned, the standard errors for statistics by age are considerably smaller than those shown while those by residence are larger than the tabular values, particularly those for the rural or nonmetropolitan populations. For application to the rural population and its migrant and nonmigrant parts (rural nonmigrants, rural-rural migrants, urban-rural migrants, or the rural population of rural origin) and to the nonmetropolitan population, whether urban or rural, it is suggested that the generalized standard errors of numbers and percentages in Tables A through H be increased 50 percent. This figure is a rough estimate of the amount by which the standard errors for the rural or nonmetropolitan populations exceed those shown in the tables. The values appearing in the tables may be used for the urban population, the metropolitan population, and for populations not separated by residence.

Standard Errors for Numbers of Persons or Families.--Table A contains the standard errors of estimates of the number of white persons in a given class. It should also be used for estimates for "all races" and when no separation by race has been provided. Table C is the corresponding table for Negroes and other races and should be applied to estimates for Negroes. Table B contains the standard error of estimates of the number of families in a given class (all races or white). Table B should also be used for items which can typically appear only once in a given family, such as "number of male heads". Table D provides standard error estimates for families of Negroes and other races.

Standard Errors for Percentages.--The reliability of an estimated percentage, computed by using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which this percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more.

Table E shows the standard errors of estimated percentages of white persons for different sizes of bases of percentages. Table F shows the standard errors of estimated percentages of families (all races or white). Corresponding estimates for Negroes and other races are contained in Tables G and H.

Illustration of Standard Error Computation.--As an illustration of how these tables may be used to compute the standard error of an SEO estimate, consider the following example. Table 9 indicates that there were an estimated 3,761,000 white female-headed families for whom migration status and residence history information was obtained. Table B shows that the standard error of an estimate of this size is between 103,000 (for an estimate of 2,500,000) and 142,000 (for an estimate of 5,000,000). Interpolating linearly, we find that the standard error is approximately:

$$103,000 + \frac{3,761,000 - 2,500,000}{5,000,000 - 2,500,000} \times (142,000 - 103,000) = 123,000$$

The chances are about 68 out of 100 that the estimate would have differed from a complete census figure by less than 123,000. The chances are 95 out of 100

that the estimate would have differed from a complete census figure by less than 246,000 (two standard errors).

Other Standard Errors.--Standard errors for medians are shown in the tables of this report whenever the median of a distribution is given. These standard errors (1 sigma, or approximately 68 chances out of 100) were calculated by establishing confidence limits around the 50th percentile of the distribution of known values, translating the upper confidence limit into the units of the distribution (years of school completed or dollars, for example) and subtracting the median from the value of the upper confidence limit.

The median-specific standard errors for the rural populations were based on generalized standard errors which had been increased 50 percent. The standard errors for fertility ratios did not incorporate this adjustment, and in application, the standard errors for ratios for rural women shown on tables 48 and 49 should be adjusted upward 50 percent.

Standard errors are not shown for the estimated means. The standard error of an estimated mean may be determined approximately by the following formula when the tabulation includes the distribution as well as the mean value:

$$S^2 = \frac{R}{n} \left[\sum_{i=1}^c P_i X_i^2 - \bar{X}^2 \right]$$

where

n is the weighted total number of cases in all C classes.

P_i is the proportion of total cases in the i^{th} class.

X_i is an estimate of the mean in the i^{th} class.

\bar{X} is the mean of the distribution, i.e. $\bar{X} = \sum_{i=1}^c P_i X_i$

R is a constant which depends on the sample size, the sample design, and the estimation procedure. For distributions of the total or white population, $R = 6,200$ may be used. For Negroes, the value for R is 3,900.

Related Reports

A detailed account of editing, sample design, and weighting of the SEO, and comparison of selected characteristics from the SEO and CPS appears in the following documentation of the SEO:

1. 1966 and 1967 Survey of Economic Opportunity Computer Consistency Checks (11).
2. 1966 and 1967 Survey of Economic Opportunity Sample Design and Weighting (12).

3. The Comparison of Selected Economic and Demographic Characteristics from the 1966 and 1967 Survey of Economic Opportunity and the Current Population Surveys (13).
4. 1966 and 1967 Survey of Economic Opportunity Sample Variance Estimates (14).

These items may be obtained by writing to the Programming and Computation Service, Social Science Building, University of Wisconsin, Madison, Wis. 53706.

Current Population Reports of the Bureau of the Census that are comparable with the SEO are Series P-60, numbers 53, 55, 58, 61 on 1966 income and work experience, Series P-20, numbers 166, 169, 170, 171, 173 on household and family characteristics, educational attainment, and mobility. Census Bureau studies of the SEO appear in Series P-20, numbers 211 and 223 on fertility, marriage, and other related social and economic variations in family and in Series P-20, numbers 202 and 216 on labor union membership by earnings, occupation, and industry (15-27).

A complete bibliography of studies based on the SEO can be obtained by writing to the University of Wisconsin address given above.

TABLE A.--TOTAL OR WHITE PERSONS: STANDARD ERRORS
OF ESTIMATED NUMBERS OF PERSONS
(68 chances out of 100)

| Size of estimate | Standard error | Size of estimate | Standard error |
|---------------------|-------------------|---------------------|-------------------|
| 25,000..... | 12,000 | 2,500,000..... | 120,000 |
| 50,000..... | 17,000 | 5,000,000..... | 169,000 |
| 100,000..... | 24,000 | 10,000,000..... | 236,000 |
| 250,000..... | 38,000 | 25,000,000..... | 362,000 |
| 500,000..... | 54,000 | 50,000,000..... | 484,000 |
| 1,000,000..... | 76,000 | 100,000,000..... | 597,000 |

Note: For rural-nonmigrants, rural-rural migrants, urban-rural migrants, or the rural population of rural origin, and for the nonmetropolitan population, the standard errors shown should be increased 50 percent. "Total or white" in title means table can be used for estimates for whites or "all races" or when no separation by race has been provided.

TABLE B.--TOTAL OR WHITE FAMILIES: STANDARD ERRORS
OF ESTIMATED NUMBERS OF FAMILIES
(68 chances out of 100)

| Size of estimate | Standard error | Size of estimate | Standard error |
|---------------------|-------------------|---------------------|-------------------|
| 25,000..... | 11,000 | 1,000,000..... | 66,000 |
| 50,000..... | 15,000 | 2,500,000..... | 103,000 |
| 100,000..... | 21,000 | 5,000,000..... | 142,000 |
| 250,000..... | 33,000 | 10,000,000..... | 192,000 |
| 500,000..... | 47,000 | 25,000,000..... | 252,000 |

Note: For rural-nonmigrants, rural-rural migrants, urban-rural migrants, or the rural population of rural origin, and for the nonmetropolitan population, the standard errors shown should be increased 50 percent. "Total or white" in title means table can be used for estimates for whites or "all races" or when no separation by race has been provided.

TABLE C.--NEGROES: STANDARD ERRORS OF
ESTIMATED NUMBERS OF PERSONS

(68 chances out of 100)

| Size of estimate | Standard error | Size of estimate | Standard error |
|---------------------|-------------------|---------------------|-------------------|
| 25,000.... | 7,000 | 1,000,000.... | 47,000 |
| 50,000.... | 10,000 | 2,500,000.... | 83,000 |
| 100,000.... | 14,000 | 5,000,000.... | 135,000 |
| 250,000.... | 22,000 | 10,000,000.... | 197,000 |
| 500,000.... | 32,000 | | |

Note: For rural-nonmigrants, rural-rural migrants, urban-rural migrants, or the rural population of rural origin, and for the nonmetropolitan population, the standard errors shown should be increased 50 percent.

TABLE D.--NEGRO FAMILIES: STANDARD ERRORS
OF ESTIMATED NUMBERS OF FAMILIES

(68 chances out of 100)

| Size of estimate | Standard error | Size of estimate | Standard error |
|---------------------|-------------------|---------------------|-------------------|
| 25,000.... | 7,000 | 500,000.... | 29,000 |
| 50,000.... | 9,000 | 1,000,000.... | 40,000 |
| 100,000.... | 13,000 | 2,500,000.... | 62,000 |
| 250,000.... | 21,000 | | |

Note: For rural-nonmigrants, rural-rural migrants, urban-rural migrants, or the rural population of rural origin, and for the nonmetropolitan population, the standard errors shown should be increased 50 percent.

TABLE E.--TOTAL OR WHITE PERSONS: STANDARD ERROR
OF ESTIMATED PERCENTAGES OF PERSONS

(68 chances out of 100)

| Estimated percentage | Base of estimated percentage (thousands) | | | | | | | |
|-------------------------|--|-------|-------|-------|--------|--------|--------|---------|
| | 500 | 1,000 | 2,500 | 5,000 | 10,000 | 25,000 | 50,000 | 100,000 |

| 20 or 80.... | 2.4 | 1.7 | 1.1 | 0.8 | 0.5 |
| 25 or 75.... | 2.6 | 1.9 | 1.2 | 0.8 | 0.6 |
| 35 or 65.... | 2.9 | 2.0 | 1.3 | 0.9 | 0.6 |
| 50 | 3.0 | 2.1 | 1.4 | 1.0 | 0.7 |

Note: For rural-nonmigrants, rural-rural migrants, urban-rural migrants, or the rural population of rural origin, and for the nonmetropolitan population, the standard errors shown should be increased 50 percent.

TABLE H.--NEGRO FAMILIES: STANDARD ERRORS
OF ESTIMATED PERCENTAGES OF FAMILIES
(68 chances out of 100)

| Estimated percentage | Base of estimated percentage (thousands) | | |
|-------------------------|--|-------|-------|
| | 500 | 1,000 | 2,500 |
| 2 or 98.... | 0.8 | 0.6 | 0.4 |
| 5 or 95.... | 1.3 | 0.9 | 0.6 |
| 10 or 90.... | 1.7 | 1.2 | 0.8 |
| 15 or 85.... | 2.1 | 1.5 | 0.9 |
| 20 or 80.... | 2.3 | 1.6 | 1.0 |
| 25 or 75.... | 2.5 | 1.9 | 1.1 |
| 35 or 65.... | 2.8 | 2.0 | 1.2 |
| 50 | 2.9 | 2.1 | 1.3 |

Note: For rural-nonmigrants, rural-rural migrants, urban-rural migrants, or the rural population of rural origin, and for the nonmetropolitan population, the standard errors shown should be increased 50 percent.

Chapter 21.--Definitions and Explanations

Definitions and explanations of concepts customarily used in the CPS have been taken directly or adapted from statements appearing in Bureau of the Census Series P-20, P-60, and related reports, and from U.S. Department of Labor, Special Labor Force Reports on Work Experience of the Population (28, 29, and 30).

General

Population Coverage.--Data from the 1967 SEO are for the U.S. population, excluding the relatively small number of inmates of institutions. Of the Armed Forces, only members living off post or with families on post in the United States are included.

Date of 1967 SEO.--About 85 percent of the 1967 SEO schedules were completed in February and March 1967, the remainder by early June. These dates of interview do not affect information relating to the previous year, except as a longer time period affects recall. Responses tied to a time period in 1967, such as age, may be affected by the date of interview.

1967 SEO Poverty Definition.--In the 1967 SEO, poverty status was determined for each family (or unrelated individual) by relating the 1966 income of its members to a standard set of poverty-level income thresholds, used in Federal statistical reports to identify the poor. These thresholds were developed by the Social Security Administration (SSA) in 1964, and revised by a Federal Interagency Committee in 1969. ^{5/} They provide a range of income cutoffs adjusted by such factors as family size, sex of the family head, number of children under 18 years old, and farm-nonfarm residence. At the core of this definition of poverty is a nutritionally adequate food plan ("economy" plan)

^{5/} For a detailed description of the poverty index used in Federal statistical programs, see Mollie Orshansky, "Counting the Poor: Another Look at the Poverty Profile". Social Security Bulletin, January 1965; and "Who's Who Among the Poor: A Demographic View of Poverty". Social Security Bulletin, July 1965 (31 and 32). Revision of poverty thresholds is discussed in "Poverty in the United States, 1959-68" published by the Bureau of the Census (29). Premises underlying the official poverty definition were critically evaluated by J. Patrick Madden in "Poverty Measures as Indicators of Social Welfare" (33).

designed by USDA for "emergency or temporary use when funds are low". The SSA poverty thresholds also take into account differences in the cost of living between farm and nonfarm families. Annual revisions in these thresholds are based on changes in the consumer price index. 6/

Poverty thresholds used in this study (top section of table I) were the same as those used by the Bureau of the Census and other Federal agencies for revised 1967 poverty population estimates. The number of families and unrelated individuals associated with each poverty threshold and the numbers and percentages in poverty appear in the lower sections of table I.

Incidence of Poverty.--The percentage of families or persons within a given category living under poverty conditions is often referred to as the "incidence of poverty". It is used here as a broad measure of how successfully persons in various residence, migration, or other categories have fared in their environments.

Demographic Characteristics

Race.--In the 1967 SEO, the population was divided into three groups: White, Negro, and "other races". The last category includes Indians, Japanese, Chinese, and all groups other than white and Negro. In this report, estimates are shown separately for whites and Negroes, and in the text, the term "race" refers to this division. Nonwhites other than Negroes are included in estimates for all races but are not shown separately.

Age.--Classifications used were based on age of the person at his last birthday. In extensive cross-classifications, data are generally shown for broad age groups--14-16, 17-29, 30-49, and 50 and over. These age categories were predicated for the study on sample size, questions relating to migration experience, and assumptions concerning changes in life cycle, which broadly reflect migratory behavior and incidence of poverty.

1967 Residence

Residence was determined on the basis of the classification of the place in which the household was located in 1967. Several classifications of 1967 residence available in the SEO were used in this report. They are: (1) rural and urban residence, (2) region, (3) Standard Metropolitan Statistical Areas (SMSA's) and nonmetropolitan areas, (4) central cities and rings of metropolitan area, (5) poor and nonpoor areas of central cities of SMSA's of 250,000 and over in 1960, (6) SMSA's by four size categories, and (7) farm-nonfarm residence.

6/ When poverty status of households is referred to in this report, the classification is that of the interview unit which contained the household head.

TABLE 1.--UNITED STATES--FAMILIES AND UNRELATED INDIVIDUALS: POVERTY THRESHOLDS AND NUMBERS OF FAMILIES AND UNRELATED INDIVIDUALS WITH EACH THRESHOLD, BY SELECTED CHARACTERISTICS, 1967

| SEX, FAMILIES, AND UNRELATED INDIVIDUALS | NONFARM RESIDENCE IN 1967 | | | | | | | FARM RESIDENCE IN 1967 | | | | | | |

SOURCE: UNITED STATES DEPARTMENT OF AGRICULTURE-UNIVERSITY OF GEORGIA STUDY OF THE "POVERTY DIMENSIONS OF RURAL-TO-URBAN MIGRATION BASED ON THE 1967 SURVEY OF ECONOMIC OPPORTUNITY."

SEO Rural and Urban Residence.--This 1967 residence classification is the most important in the study, as it provides the terminal dimension for the major analytical categories (see "Migration Status and Residence History" below). However, as noted earlier, populations designated here as rural and urban differ somewhat from similarly identified populations which might have been obtained from a census taken at that time. In general, rural areas consist of open country and places of less than 2,500 people.

Region.--States included in each of the four regions are as follows: Northeast--Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, and New Jersey; North Central--Ohio, Indiana, Illinois, Wisconsin, Michigan, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas; South--Maryland, Delaware, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas; West--Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, and Hawaii.

In some tables in this report, the Northeast, North Central and West regions are combined into one broad region labeled "North and West".

Metropolitan-Nonmetropolitan Residence.--In the 1967 SEO, SMSA's were defined as in the 1960 Census of Population, with one exception. The two New Jersey counties of Somerset and Middlesex were treated as metropolitan in the SEO, though they were not in an SMSA in 1960.

In 1960, except in New England, an SMSA was a county or group of contiguous counties containing at least one city of 50,000 inhabitants or more or "twin cities" with a combined population of at least 50,000. In addition, counties contiguous to the central counties were included in an SMSA if, according to certain criteria, they were essentially metropolitan in character and socially and economically integrated with the central city. In New England, SMSA's consisted of towns and cities, rather than counties.

Central Cities and Rings of SMSA's.--In the SEO, as in the censuses and the CPS, the metropolitan population was further classified as "in central cities" and "outside central cities" (often termed "rings"). With a few exceptions, central cities in 1960 were determined according to the following criteria:

1. The largest city in an SMSA was always a central city.
2. One or two additional cities were secondary central cities if they had at least 250,000 inhabitants or if they had a minimum population of 25,000 that was one-third or more the size of the largest city.

Poor and Nonpoor Areas of Central Cities of SMSA's with Population of 250,000 and Over in 1960.--In general, poor areas of central cities of SMSA's with 250,000 people were groups of tracts falling in the lowest quartile of a composite economic index based on percentage of families with cash incomes under \$3,000 in 1959, percentage of children under 18 years not living with both parents, percentage of males 25 years old and over with less than 8 years of

school completed, percentage of unskilled males (laborers and service workers) age 14 and over in the employed civilian labor force, and percentage of housing units lacking some or all plumbing facilities or in a dilapidated condition. Nonpoor areas are groups of tracts falling in the other three quartiles of the index.

Size of SMSA's.--SMSA's were classified by size into the following categories based on their 1960 populations:

- Under 250,000
- 250,000 but under 500,000
- 500,000 but under 750,000
- 750,000 or more

Farm-Nonfarm Residence.--Farm population refers to rural residents living on places of less than 10 acres yielding agricultural products which sold for \$250 or more in the previous year, or places of 10 acres or more yielding agricultural products which sold for \$50 or more in the previous year. Rural persons in institutions, motels, and tourist camps, and people living on rented places where no land was used for farming were not included in the farm population.

Migration Status and Residence History

Migration Status.--In the 1967 SEO, migrants were persons 14 years old and over who had ever lived more than 50 miles from their 1967 address. Nonmigrants were persons who had never lived this distance from their 1967 location.

Detailed and Abbreviated Residence History.--All migrants were asked about the "last such place" in which they had lived (termed penultimate residence), including size or type of place, State or foreign country, and the age at which they had left. If they had made more than one move and were at least 17 years old, migrants were asked the size or type of place and the State or foreign country in which they had lived at age 16 (fig. 1).

Previous residences reported as being in the suburbs or in large, medium, or small cities were classified as urban for this study. Residences reported as being in a town or village and in the open country--whether farm or nonfarm--were classified as rural.

SEO enumerators were instructed to read categories for age 16 and penultimate residences in the order listed until a "yes" answer was received. (They were instructed not to read the sizes of the places. Sizes were listed to guide enumerators' answers if the respondent questioned what "large-", "middle-", or "small-" sized cities meant.) No special instructions were provided concerning what constituted a farm or rural nonfarm residence. In effect, the respondent was permitted to determine if his residences had been on a farm, or in the open country but not on a farm.

As indicated above in the discussion of SEO rural and urban populations in 1967, rural and urban classifications of age 16 and penultimate residence should

be considered subjective rather than precise approximations of similar residence categories of population used in decennial censuses and the CPS.

These designations of rural or urban previous residences used in conjunction with urban or rural classification of residence in 1967 (see above) determined the cross-environmental classification of migrants used in this study (fig. 2).

Residence History Categories.--For persons with two residence observations, detailed and abbreviated residence classifications were the same. They were based on the rural or urban classifications of respondents' penultimate and 1967 residences. For persons with three residence observations, detailed residence classifications were based on the rural or urban classifications of respondents' age 16, penultimate, and 1967 residences. Their abbreviated classification was determined from age 16 and 1967 residences. (See six-way and four-way classification scheme below.)

Unless otherwise specified, the population discussed in the text and shown in the tables is the civilian noninstitutional population, 14 or 17 years old and over (by age groups) for whom information on migration status and residence history was complete in the 1967 SEO.

Six-Way Migrant or Residence History Classification.--This term refers to the following categorization of the adult population:

Rural-urban migrants
Urban-urban migrants
Urban-rural migrants
Rural-rural migrants

Rural nonmigrants
Urban nonmigrants

Four-Way Migrant or Residence History Classification.--This term refers to a collapsed version of the six-way classification as follows:

Rural-urban migrants

Urban population of
urban origin

(combines urban nonmigrants
and urban-urban migrants)

Urban-rural migrants

Rural population of
rural origin

(combines rural nonmigrants
and rural-rural migrants)

Farm or Nonfarm Origin of Rural-Urban Migrants.--Farm or rural nonfarm residence of origin of these migrants was determined from responses to questions relating to their initial residences (fig. 1).

Intra- and Inter-Regional Migrants.--Intra- and inter-regional migrants refer to persons who moved within or between two broad areas of the country--the

South, and the North and West combined. Initial and 1967 residence observations were used in these designations; region of penultimate residence was disregarded. Persons were omitted whose initial residence was a place outside the United States--such as the Trust Territories, Puerto Rico, and foreign countries--or whose regional residence history was incomplete.

Decade of Last Move.--The approximate year a migrant made his last move was determined from his age when he left his penultimate home and his age at the time of the survey in 1967. The year of last move is indicated as "approximate" for several reasons. Some persons had already had their 1967 birthday by the time the enumerator reached them while others had not. The precise date of the 1967 interview was not recorded on the data files. Some respondents apparently gave an approximate age at time of migration, and ages at migration of some persons who probably moved together disagree with differences in their ages in 1967. Categories shown in this volume are: Prior to 1940, 1940-49, 1950-59, and 1960-67.

Single-Stage and Multistage Migrants.--Migrants reported on place and type of residence of one or two previous residences, depending on whether they had left their penultimate homes before or after reaching age 17. All persons 14-16 years old were single-stage migrants, as were those 17 years and over who gave information on penultimate and 1967 residences only. Multistage migrants were persons 17 and over who gave information on age 16, penultimate, and 1967 residences. Multistage migrants moved at least twice to reach their 1967 residence. They may, in fact, have moved more times, but information on more than two previous residences was not called for in the SEO.

Social Characteristics

Household.--A household consisted of all persons who occupied a room, a house, or an apartment or other group of rooms, which constituted a housing unit. A group of rooms or a single room comprised a housing unit when it was occupied as separate living quarters; that is, occupants did not live and eat with other persons in the structure, and there was either (1) direct access from the outside or through a common hall, or (2) a kitchen or cooking equipment for the exclusive use of these occupants. The count of households excluded persons living in group quarters; such as rooming houses, military barracks, and institutions.

Head of Household.--One person in each household was designated as the "head". The number of households, therefore, is equal to the number of heads. The household head was usually the person regarded as the head by its other members. Women were not classified as heads if their husbands were living in the household at the time of the survey. Married couples related to the head of the household were included in that head's household and were not placed in separate households.

Relationship to Head of Household.--Household members were classified as (1) head, (2) wife, (3) child, (4) grandchild, (5) parent or parent-in-law, (6) other relative, (7) secondary family member, (8) secondary individual, and (9) foster child.

Families and Unrelated Individuals (Interview Units).--As indicated in the sections on poverty definitions, all related members of a household constituted a "family" and a separate "interview unit". Persons who lived alone or with other persons to whom they were not related (unrelated individuals) each constituted a separate interview unit.

Family.--The term "family", as used in this report, refers to a group of two or more persons related by blood, marriage, or adoption who reside together; all such persons were considered members of the same family. Thus, if the son of the household head and the son's wife were in the household, they were treated as part of the head's family. On the other hand, a lodger and spouse not related to the household head or an unrelated servant and spouse were considered secondary families and constituted separate interview units.

Head of Family.--As with households, one person in each family was designated as the "head". The number of families, therefore, is equal to the number of heads. The head of a family was usually the person regarded as the head by its other members. Women were not classified as heads if their husbands were resident members at the time of the survey. Married couples (where the husband was not head of the family) living with other relatives constituted a "subfamily" but not a separate interview unit.

Relationship to Head of Family.--Members were classified as (1) head, (2) wife, (3) child, or (4) other relative. Children of the head included only those under 18 years of age who had never been married. Sons and daughters 18 years or over and those who had ever been married were classified as other relatives.

Family Size and Composition.--Information on number of people living in the family at the time of the interview and their relationship to the family head were combined to produce the analytical categories below. For male heads, composition categories were based on the presence of wife, children under 18 years, and other relatives. For female heads, presence or absence of children under 18 years, and other relatives formed the basis of classification:

Male heads--

With wife present:

None of own children or other relatives

Own children only

Own children and other relatives

Other relatives only

No wife present:

Own children only

Own children and other relatives

Other relatives only

Female heads--

Own children

Own children and other relatives

Other relatives only

Years of School Completed.--Data on years of school completed were derived from the combination of answers to questions concerning the highest grade of school attended and whether that grade was completed. Questions on educational attainment applied only to progress in "regular" schools. Such schools included graded public, private, and parochial elementary and high schools (both junior and senior high); and colleges, universities, and professional schools, whether day or night. Such regular schooling advanced a person toward an elementary school certificate; a high school diploma; or a college, university, or professional school degree. Schooling in other than regular schools was counted only if the credits obtained were regarded as transferable to a regular school.

Marital Status.--The following categories of marital status at the time of interview were used: (1) never married, (2) married, (3) widowed, (4) divorced, and (5) separated.

Children Ever Born.--In the 1967 SEO, women who had ever been married were asked how many babies they had ever had, not counting stillbirths. Thus, information was obtained on all live births to women who were married, widowed, divorced, or separated at the time of the survey. Also included were children born to women who had not married and had their own children in their households. All live births were to be included even if children subsequently died or were living outside the family. The enumerator was instructed to include children born to the woman before her present marriage. The Bureau of the Census indicated in a recent publication that "...the data are, no doubt, less complete for illegitimate births than for legitimate births. Consequently, the rates of children ever born per 1,000 total women may be somewhat low" (29).

In the 1967 SEO, the enumerator recorded the number of children ever born from zero to nine, with a terminal category of "10 or more". For purposes of computing the total number of children ever born, the terminal category was given a mean value of 10, rather than 11 as is customarily done by the Bureau of the Census. The ratio of children ever born per 1,000 women therefore will be somewhat low in certain categories.

Economic Characteristics

Questions in the 1967 SEO relating to work experience were approximately the same as those included in annual CPS surveys and published by the U. S. Department of Labor in Special Labor Force Reports. Some of the definitions and explanations below come directly from the work experience report for 1966 or have only minor modifications (30).

Work-Limiting Health Conditions.--Information was obtained for persons 14-64 years of age on health conditions, if any, which limited the kind or amount of work they could do.

Work Experience in 1966

Estimates for this report include persons 14 years of age or more in the civilian noninstitutional population who worked at sometime in the year 1966. Excluded were all members of the Armed Forces and inmates of penal institutions.

tuberculosis sanitariums, and the like. A person with work experience was anyone who worked as a civilian at any time during the year on a full- or part-time basis.

Employed in 1966.--Employed persons comprised (1) all those who, during 1966, worked as paid employees or in their own business or profession, on their own farm, or who worked 15 hours or more as unpaid employees in an enterprise operated by a family member, and (2) all persons not working but with jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs.

Unemployed (Looked for Work) in 1966.--Unemployed persons comprised all persons who did not work in 1966 but made specific efforts to find jobs and were available for work.

Civilian Labor Force in 1966.--The civilian labor force consisted of all persons classified as employed or unemployed according to the above definitions.

Not in Civilian Labor Force in 1966.--All persons 14 years of age or more in the civilian noninstitutional population not classified as employed or unemployed were defined as not in the labor force. Persons doing only incidental unpaid family work were also classified as not in the labor force.

Not Employed in 1966.--All unemployed persons and those not in the labor force according to definitions above constituted the not employed in 1966.

Weeks Worked in 1966.--Persons with work experience were classified according to the number of weeks in which they worked during the year as civilians for pay or profit (including paid vacations and sick leave) or worked without pay on a family-operated farm or business.

Labor Force Participation Rate.--Persons in labor force as a percentage of total civilian noninstitutional population.

Unemployment Rate.--Persons with no employment as a percentage of total civilian noninstitutional population.

Looking For Work Rate.--This rate differs from the unemployment rate because it relates the unemployed (persons looking for work) to the nonworkers rather than to persons in the labor force.

Longest Job.--A person's longest job during the year was the one at which he worked the greatest number of weeks. For most wage and salary workers, a job was defined as representing all the time worked for the same employer. The only exception was work for private families (domestic service, babysitting, odd jobs, and the like) which was counted as a single job, regardless of number of employers. Self-employment and unpaid work in family-operated enterprises were also designated as jobs.

Occupation and Industry in 1966.--Data on occupation and industry refer to the job held longest during the year. Persons who held two jobs or more were re-

ported in the job at which they worked the greatest number of weeks. Occupation and industry categories used in the SEO were those used in the 1960 Census of Population.

Income in 1966 7/

Total Money Income for Families and Unrelated Individuals.--In the SEO, questions on income from wages and salaries, business or professional practice or partnership, or own farm related to all civilians 14 years old and over who worked in 1966. Though income data relate to the year 1966, characteristics of persons for whom economic information is presented--such as age, race, sex, migration or residence history--refer to status or condition at the time of the interview in 1967.

Total income was the algebraic sum of money wages and salaries, net income from self-employment, and income other than earnings received by all income recipients in the family. For each unrelated person, total income was the algebraic sum of his money income from all sources.

In the income tables, the lowest group includes those that had no income in 1966 and those reporting a loss in net income from farm and nonfarm self-employment or rental income. Many of these were living on income "in kind", savings, or gifts were in newly constituted households, were unrelated individuals who had recently left families, or were in units in which the sole breadwinner had recently died or left the household. However, many of the units which reported no income probably had some money income which was not recorded in the survey.

Public Assistance or Welfare Payments.--This category included money received from old-age assistance, aid to families with dependent children, and aid to the blind or totally disabled. Social Security payments were not included nor were food, clothing, or other nonmonetary receipts from relief agencies.

Assets, Liabilities, and Net Worth

Assets.--The asset item from the 1967 SEO used here was the sum of the 1967 market value of items owned by members of each interview unit, such as homes, land, businesses, equipment, stocks, bonds, and loans to other people. The market value was that amount which the respondent would expect to receive at that time, not what he had paid.

Members of interview units were to report on total market value of (1) farm operation (including value of land, buildings, house, equipment, trucks, livestock, stored crops, and other assets) and whether this value included value of home; (2) all assets in a business, including tools and equipment; (3) house or apartment or any other real estate; (4) money in checking and savings accounts, credit unions, or any other place; (5) U.S. savings or other Government bonds, private stocks, bonds, or other investments, personal loans to

7/ Detailed information on income as defined for Current Population Surveys (after which the SEO was patterned) is in Bureau of the Census, Series P-60, No. 53 (December 28, 1967) (15) and related reports.

others, or mortgages; (6) cars or trucks owned; and (7) any other assets, excluding personal belongings, household furnishings, furniture, and clothing.

Liabilities.--The liabilities item from the 1967 SEO used here was the sum of mortgages or other debts owed on all items listed as assets plus money owed to (1) stores for food, clothing, and appliances; (2) companies for utilities, fuel, gasoline, and so on; (3) doctors, dentists, hospitals, or other medical care; (4) banks or other financial or lending institutions; and (5) friends, relatives, or other private persons.

Net Worth.--Net worth was equal to the value of all assets minus the value of all liabilities.

Medians, Means, and Rounding

Median.--The median is the amount that divides a distribution into two equal parts, one having value (of income, for instance) above and the other having value below that amount. 8/

Mean.--The mean is the amount obtained by dividing aggregate value of some item (income, for instance) for a specified category by number of persons or families in that category. 8/

Rounding.--All numbers and percentages were independently rounded; therefore, parts do not necessarily sum precisely to totals. Percentages were computed after data had been rounded to thousands.

8/ These measures were based on the number of persons or families for whom values were included in the SEO files.
